

MODERN HYSTEROSCOPY COURSE

Hands-on training combined with live surgery sessions

The remarkable progression of hysteroscopic techniques and instruments has inspired the experts of The European Academy to design an intensive course with major attention to the hands-on training and live surgical demonstrations. The limited number of 2 participants per training station and the established experience of the programme coordinators guarantee the most efficient learning effect. Special attention is given to new technologies and their application spectrum.

- DAY 1: Diagnostic hysteroscopy
- DAY 2: Mechanical operative hysteroscopy
- DAY 3: Bipolar resectoscopy

Objectives

This course aims to achieve the following objectives:

- Perform an ambulatory diagnostic-operative hysteroscopy
- Become familiar with new indications for the operative hysteroscopy, like the exploration of the sub-endometrial myometrium with the TROPHY resectoscope
- Participants should be able to start with major uterine surgery

Requirements

The course is aimed at all gynaecologists with a special interest in hysteroscopy, however experience of more than 50 diagnostic and 20 operative procedures is required.

Registration details

Course language: English

Course fee:

- €990: Regular rate
- €890: ESGE Members & Residents (proof of residency required)
