This course is intended for 34 participants working on 17 surgical tables supervised by more than 17 European experts in this field, i.e., 1 expert per table. Each table is equipped with a high-definition video system connected to a 2.4mm scope to suit the specialty's needs and to accommodate the required instrumentation. Each video system is connected to the table of the course director who performs live demonstrations before participants start the procedures themselves. The basic course is intended for all surgeons interested in hand surgery, and in particular wrist surgery. Attending this course should allow participants to practice wrist arthroscopy skillfully and safely.
